

The Future of Work

Theme Tour @ LogiVille

New theme partners

ARTION

Facility assistance through the consolidation and digitisation of inspections, resulting in more efficient processes and time savings.

BOSTON DYNAMICS

Experience a live demonstration of the autonomous 'Spot' robot and discover the impressive applications of the 'Stretch' robot via a fascinating use case.

CUSTOMAITE

Learn how Human Assisted AI efficiently and flawlessly supports repetitive administrative tasks.

DATASHIFT

Discover how AI-assistants can control administrative tasks, which allows employees to focus on strategic and valuable work.

PROXIMUS

Discover the VR-training box for first aid, fire and safety in warehouses, as well as VR solutions for remote assistance of technicians.

OTHUS

Digital connectivity in action: experience how operators are directly connected with mobile devices and machines via smartwatches.

THE HAZARD FACTORY

Interactive VR-safety trainings that result in lower learning curve, higher participation, and swifter knowledge absorption through realistic scenarios.

The Future of Work

Theme Tour @ LogiVille

Innovation partners

ALAX AUTOMATION

Learn how cobots like the palletizer and goods-to-person pallet AMRs revolutionize warehouse processes.

ALThERIA

XR-trainings for logistics applications in which employees will be educated effectively and interactively through immersive simulations.

ART4L

Experience AR-assisted orderpicking that facilitates faster and more accurate processes.

DELOITTE

Immerse yourself in a gamified warehouse environment and an impressive VR-simulation in the cleanroom.

EYEESEE

Identify how drones take inventory and collaborate semi-automatically with humans.

NEXTDRIVER

Discover how gamification improves driver competency and helps optimize transport companies.

SENSOLUS

Maintain inventory, assets, conditions and maintenance via smart tagging and tracking.

TOYOTA MATERIAL HANDLING

Discover Autopilot-technology for collaboration in warehouses between man and machine.

ZEAL ROBOTICS

Discover the interactive "lead-me" picking robot that supports the warehouse crew.

ZETES

Get acquainted with human-scanbox collaborations for efficient inventory.
